

## **Assistant Professor in Ecological Genomics of Grassland Plants.**

We seek to fill a temporary Assistant Professor position with an individual who combines field and laboratory approaches for hypothesis driven research on the genomic basis of plant adaptation to the extreme environment of the Northern Plains. Teaching duties each year will include Systematic Botany and coordination of Introductory Biology labs for non-majors. The position is a regular 9 month academic appointment available for a minimum of two years. The position will begin 16 August 2010 and a PhD is required, with post-doctoral experience desirable. Review of applications will begin October 2 and continue until the position is filled. Send CV, three representative reprints, statement of teaching and research interests, and have three letters of reference sent to Dr. Steven Ralph (Ecological Genomics), 10 Cornell St. Stop 9019, University of North Dakota, Grand Forks, ND 58202-9019.
