How to Remain Relevant in the Age of Change
(What GIS Pros Can Do to Keep their Skills in Demand)

Technology moves fast and when you have your head down doing your job, it is easy to miss where the spatial industry is headed. But you don't have to stay focused on Twitter all day to know how to keep your skills relevant. There are a couple technologies that GIS and Mapping use that will keep you on top of today's technology trends and make sure you are completely relevant in today's workforce. James will go over some amazingly simple ways to make sure you don't get left behind and give you the tools to be successful in any GIS job.
